

Cloud Platform

Introducing LPRS Connected Solution's (LPRS CS) Industrial IoT platform

Cloud

Alert

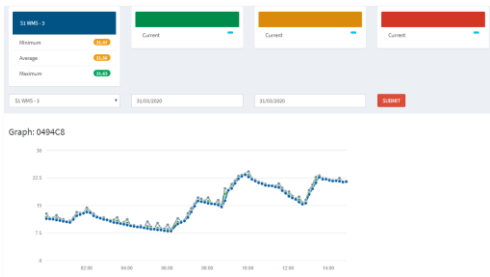

Automate

Manage

Track

Technology

Using the latest cloud hosted framework, LPRS CS's Platform provides a scalable solution for monitoring any device that can access the internet.

Interface

The system employs an easy to use and intuitive graphical interface which allows the user to quickly and effectively monitor connected devices. Add new devices, users and alerts with ease and en masse.

Management

Built in alerting engine provides near real time device monitoring. Alerts can be sent via email, SMS, WhatsApp and Messenger, with audit trail available of alert history.

Automate

Automate existing manual processes by focusing on the exception as opposed to the rule.

Data

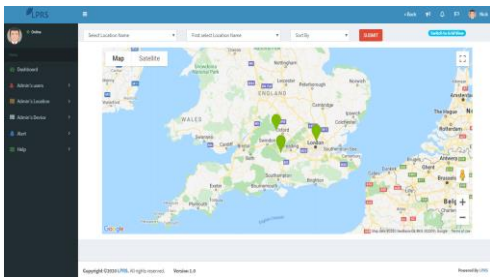

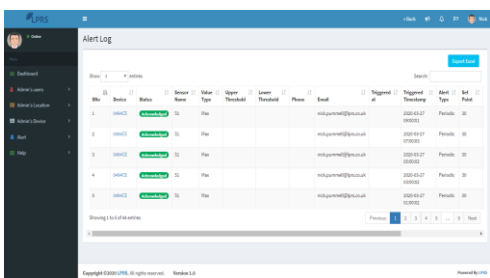

Easily drill down into the data to view trends and gain previously unknown insights into how your devices perform. Use the newly gathered data to drive efficiency and stand out from the competition.

Track

Mobile phone app for tracking field based operatives.

White label

Available with either LPRS CS's branding or your own (fees apply). Fully licensed options available for a one time fee.

ID	Status	Name	Type	Message	Timestamp
1	OK	Device 1	Temp	Temperature: 25.5	2023-01-01 10:00:00
2	Alert	Device 2	Pressure	Pressure: 10.2	2023-01-01 11:00:00
3	OK	Device 3	Vibration	Vibration: 0.5	2023-01-01 12:00:00
4	Alert	Device 4	Location	Location: 51.5074, 0.1278	2023-01-01 13:00:00
5	OK	Device 5	Power	Power: 100%	2023-01-01 14:00:00
